EXPERIENCE

Taylor Digital – San Clemente, CA

Web Developer

March 2016-Present

- Manage complex websites and web applications for corporate clients.
- Write custom programmatic solutions to complete overall client and server side development tasks.
- Work with fellow developers to define project scope and architect database schemas.
- Perform quality assurance tests to discover errors, optimize code, and increase usability.
- Wireframe mockups and storyboard user experience through user interface analysis.

LearningFuze - Irvine, CA

Web Development Training/Remote TA

Sep 2015-February 2015

- Completed 12 week full immersion web development boot camp, requiring 12 hours per day during the week and 8 hours per day during the weekends.
- Worked on various group projects and hackathons where effective team communication was the most important aspect of getting a minimum viable product finished before deadline.
- Lead group projects as scrum master to guide task management, and helped define project scope, ran stand ups to ensure effective collaboration across the team.

Belkin International - Irvine, CA

Sales Operations Representative

May 2015-July 2015

- Responsible for sales and operational support to Belkin's largest Reseller account, by providing product, technical, and logistical knowledge to the buyers and sales teams.
- Acted as the liaison between demand planning, finance, and sales, to help decrease operational cost, and drive increased revenue through the channel.

Mavenlink - Irvine, CA

Sales Development Representative

Aug 2014-April 2015

- Built a pipeline of qualified opportunities through research, networking, and reaching out to prospective clients within the Professional Services Industry.
- Gained meeting commitments from C-Level Operations and Finance Executives, whereby I could align the prospects' challenges with Mavenlink's solution.

CDW - Chicago, IL

Inside Sales Account Manager

Oct 2012-Aug 2014

- Created and built consultative, long-term relationships within a geographical region, in order to create tailored, cost effective technology solutions that impact my customers' bottom line
- Stayed relevant on technology news and trends from a high level, to ensure the greatest amount of ROI within my customers' solutions.

EDUCATION

The Pennsylvania State University - University Park, Pa

Bachelor of Science, Health Policy & Administration

May 2012
