## EXPERIENCE

**Ethika, Inc. – San Clemente, CA**
<u>Web Developer</u>                                                      September 2016- present

- Work on and build new features into the e-commerce website and internal business management web app.
- Refactored the front/backend checkout code, integrated Apple Pay & Paypal utilizing Braintree's SDK.
- Write Symphony console commands to push and pull data from external services Google Shopping, Full Circle ERP, and Amazon MWS through API's.
- Expand the reporting capabilities by generating new sell thru reports, utilizing Mongo's aggregation framework, to create new Jquery data tables and high charts.
- Tasked to research the top front end frameworks, and lead the decision and implementation on Vue.js across both Ethika applications.
- Created a system for automated importing of external retailer client reports into Ethika's database, by writing portable/re-useable classes that parse through unique Excel documents with PHPExcel Library.

**Taylor Digital – San Clemente, CA**
<u>Web Developer</u>                                                      March 2016-September 2016

- Manage websites and web applications for corporate clients.
- Write custom programmatic solutions to complete overall client and server side development tasks.
- Work with fellow developers to define project scope and architect database schemas.
- Perform quality assurance tests to discover errors, optimize code, and increase usability.
- Wireframe mockups and storyboard user experience through user interface analysis.

**LearningFuze - Irvine, CA**
<u>Web Development Training/Remote TA</u>                          Sep 2015-February 2015

- Completed a 12 week full immersion web development boot camp, requiring 12 hours per day during the week and 8 hours per day during the weekends.
- Worked on various group projects and hack-a-thons where effective team communication was the most important aspect of getting a minimum viable product finished before deadline.
- Lead group projects as scrum master to guide task management, and helped define project scope, ran stand ups to ensure effective collaboration across the team.

**Belkin International - Irvine, CA**
<u>Sales Operations Representative</u>                               May 2015-July 2015

- Responsible for sales and operational support to Belkin's largest Reseller account, by providing product, technical, and logistical knowledge to the buyers and sales teams.
- Acted as the liaison between demand planning, finance, and sales, to help decrease operational cost, and drive increased revenue through the channel.

## EDUCATION

**The Pennsylvania State University - University Park, Pa**
<u>Bachelor of Science, Health Policy & Administration</u>          May 2012
